

CTL[™]

Automated Test Library for Call Processing Feature-rich Testing

Key Features

- Comprehensive automated test library for call processing feature testing
- Industrial standard based call processing feature tests
- Excellent for regression, feature load and sanity testing
- ✓ Build and run infinite test scenarios
- Rapid addition of custom tests with the KSL scripting language
- ✓ Managed by premier Web-based test management system -TestSecretary[™]
- Tests run on multiple platforms even with different technologies;
 CDMA, GSM and VOLTE among others

The most complete automated call processing Library for feature testing

The Call processing Test Library (CTL) is a comprehensive automated suite of tests for feature testing.

No matter the technology of your backbone network, CDMA, GSM or IMS you need to assure your costumers that all your call processing features work as advertised. With the call processing test library, you can test all your features such as; 3-way call, call forwarding, call waiting automatically eliminating the need for a multi-shift testing staff.

With the call processing test library, you can shorten the time to bring your product to market.

Built on proven technology, tests may run 24 by 7 by 365 to serve as a network Quality of Service (QoS) monitor. It also serves as an excellent regression suite and network certification tool.

The package is easy to install, configure and maintain.

The Exempler staff provides support to help you get up and running, and the tools to help build your own customized tests and libraries.

The Call Processing Test Library

Feature tests in compliance to industry call processing standards.

Tests Supported in CTL

Basic Calls

- A to B 4/7/10-digit dialing
- A to Number, 8XX/9XX
- Directory assistance
- Fax calls
- Data calls
- SMS calls

General Features

- Automatic Call Back
- Anonymous Caller Rejection
- Cancel Call Waiting
- Call Forward Busy
- Call Forward Busy Line
- Call Forward Don't Answer
- Calling Name Delivery Blocking
- Caller Number Delivery
- Call Waiting
- Local Number Portability
- Three Way Calling

Advanced Features

- Call Transfer
- Cut-off On Disconnect
 Call Forwarding Busy Unrestricted
- Call Forwarding Intragroup
- Call Forward Universal
- Call Forward Do Not Answer Unrestricted
- Call Forward Do Not Answer Variable Timer
- Call Pickup
- Call Park
- Call Waiting Originating
- Call Forwarding Group Don't Answer
- Call Forward Remote Access
- Deny Access to Class Feature

More Advanced Features

- Deny three-way calling usage sensitive
- Directed Call Park
- Directed Call Pickup
- Denied Origination
- Denied Incoming Calls
- Denied Termination
- Executive Busy Override
- Group Intercom
- International Primary Carrier
- Inhibit Line Busy
- In Session Activation
- Last Number Redial
- Make Set Busy
- Multiple Appearance Directory
 Number
- No Double Connect
- Plug-Up
- Permanent Hold
- Residential Call Hold
- Request Suspension
- Speed Calling Long
- Speed Calling Short
- · Sensitive Call forwarding
- Selective Call Rejection
- Secondary Language
- Station Controlled Conference
- Simplified Message Desk
 Interface
- Simultaneous Ringing
- Selective Call Acceptance
- Toll Denial
- Warm Line
- Simultaneous Voice-Data
- Simultaneous Voice-SMS
